

INTEGRAL WATERPROOFING COMPOUND

INTRA CEASE IC+

Integral Plasticizer &
Waterproofing
Compound For Concrete

Swadi Intra Cease IC+, a specialized integral liquid waterproofing formula. Carefully blended with advanced plasticizing agents, polymers, and additives, it effortlessly enhances cement concrete, mortar, and plasters. Experience improved cohesion, minimized segregation, and fortified construction performance – all in one remarkable solution.

WHERE TO USE

- Pre-cast and pre-stressed concrete.
- Use as a concrete admixture.
- In areas of congested reinforcement, where higher workability is required.
- Variety of concrete, e.g., marine, special concrete, pumpable etc.

DOSAGE

- 200 ml of Intra Cease IC+ with every 50 kg bag of cement.

PACKING

- 1 kg, 5 kg & 200 kg.

STANDARD COMPLIANCE

Confirms to IS 2645:2003 (specification for integral cement waterproofing compound.)
Confirms to IS 6925 (specification for chlorides in concrete admixture.)

SBR WATERPROOFING

SBR Based Multipurpose
Polymer For Waterproofing
And Repair

TRU BOND 50

Swadi TruBond 50 SBR is a modified styrene-butadiene rubber emulsion, which substantially increases the quality & performance of cement slurries & mortars. It offers high durability, reduced shrinkage, and increased flexibility & bond strength. It is also used in conjunction with Portland cement for waterproof slurries or tight render basecoat.

WHERE TO USE

- Waterproofing of roof slabs, sunken slabs, etc. in combination with cement.
- Concrete repair: Spalled concrete, repairing floors, and pre-cast slabs, etc.
- For bonding new concrete to old concrete, plaster, stone/brick masonry.
- As a bonding agent for uses in repair and plastering.
- For making polymer mortar for repairs mortars etc.

PACKING

- 1 kg, 5 kg & 20 kg.

STANDARD COMPLIANCE

Complies with standards ASTM C 109, ASTM C 348, ASTM C 642.
